

LG CNS Biodiversity Conservation Policy

LG CNS has established a biodiversity conservation policy and is implementing it to contribute to protecting the environment and ecosystems.

- We designate 'biodiversity conservation' as one of the fundamental principles of our environmental management policy and manage it as a core task, to protect the environment and ecosystems of local communities.
- To minimize the negative impacts of our business activities on ecosystems, we implement activities aimed at preventing and managing biodiversity damage.
- Based on communication and cooperation with local communities and stakeholders, we carry out biodiversity conservation activities in the areas adjacent to our business sites.
- We enable employees to contribute to ecosystem protection through voluntary participation in biodiversity conservation activities.
